Kelechi Umeh

I'm a mechanical engineer based in Port Harcourt. You can reach me on kelechi.umeh@gmail.com or 0803 555 1212.

Since March 2021 I've worked as a Maintenance Engineer at Shell Nigeria, where I run preventive maintenance for compressors on two offshore platforms and cut unplanned downtime by 18%. Before that, from 2018 to 2021, I was a Graduate Engineer at Julius Berger, rotating between plant maintenance and site supervision.

I studied Mechanical Engineering at the Federal University of Technology, Owerri, graduating with a B.Eng in 2017.

I'm good with AutoCAD, root-cause analysis and SAP PM, and I hold a NEBOSH certificate.
